

## □Changes

1. Addition of new function, "Auto PRM".
2. Addition of time out process by USB2.0.

## □New Function

"Auto PRM" function is available from this version.

Auto PRM function is the function users can upload and download parameter without PRM file settings by PC. The product's firmware needs to be corresponded to the function.

## □How to Use

In the case of the corresponding machine, check "Auto PRM" and click Upload/Download. PRM file cannot be selected. No change occurs in other operations.

## □Caution

There are some machines which do not correspond to the Auto PRM function. Even if Auto PRM is executed in such a machine, error occurs, and the execution fails. In that case, select PRM File by hand as usual.
